Paid Internship Opportunity in the Lamp Lab

Department of Entomology
University of Maryland
June-2015 through April-2016

Dr. Bill Lamp is seeking an upperclass undergraduate student to join his lab part-time, 10-15 hours/week, to focus on molecular approaches to the study of plant-insect interactions. The position requires a current University of Maryland student who has experience with molecular techniques to be applied to the presence and function of microbial symbionts associated with the salivary glands of insects, especially brown marmorated stink bug and other members of Hemiptera. Entomological experience is not required, but an interest in or willingness to learn about insects is useful. Hours during the weeks are flexible during the 2015 summer and the 2015-16 academic year. Starting pay is \$10.00/hour. The position is open until a suitable candidate is found.

If interested or you have specific questions, contact Dr. Lamp at lamp@umd.edu and attach a current resume that includes, among other items, a list of specific experiences and skills related to the position.

For more information about the lab, visit the lab website at:
